MORADABAD METAL CRAFT

Moradabad is a city in the state of Uttar Pradesh, well-known for its rich tradition of metal crafts, including brass, copper, and aluminium. It is often called as the 'Peetal Nagri' or the Brass City. The origins of metal crafts in Moradabad can be traced back to the 16th century during the Mughal era. The modern, attractive, and artistic brass ware, jewellery and trophies made by skilled artisans are the main crafts. With time new products were introduced time to time and now metals like iron, aluminium, nickel and silver are also used in metal handicraft items. The metal crafts of Moradabad are highly valued for their intricate designs, fine details, and durability.

UNIQUENESS

The uniqueness of Moradabad metal craft is in the Ram Ganga river sand and inlet of the mould used for metal casting. The sand is so thin and soft that it helps in forming perfect binding material used in metal casting process.

Price
Approx.
Rs. 500 to 50,000

Class of Goods
6

Proof of Origin
16th Century

No. of Families Involved
Approx.
50,000 workers

Type of Goods
Handicrafts

Geographical Location
Moradabad, Uttar Pradesh

METHOD OF PRODUCTION

Moradabad metal craft production typically involves a process of hand-beating, etching, engraving, and polishing. The craftsmen use hammers, chisels, and other hand tools to shape and form the metal into intricate designs. The metal is then heated and dipped in an acid solution to create the desired patina or texture. Finally, the craftsman polishes and buffs the metal to achieve a shiny finish. The production is usually done in small-scale workshops, with multiple craftsmen working together to produce the final product.
